

Research resources

EUPATI Toolbox

In coming editions of SCAN we hope to bring you information about online resources to help understand about research and research evidence.

We thank **Carole Hagan** RESCOM member and EUPATI Fellow for sending us information about the EUPATI toolkit.

The EUPATI toolkit provides trustworthy and understandable information on all aspects of the medicines development process.

The screenshot shows the EUPATI website interface. At the top, there are navigation links: Home, What is EUPATI?, EUPATI Network, Blog, and Glossary. The main heading is "The A to Z of how medicines are developed" with a sub-heading "Patient education!". Below this is a search bar with the text "Search our library by keyword" and an example "For example: drug discovery process". A "Search" button is next to the search bar. Below the search bar is a "Search our library by category" section with a grid of buttons for various topics: Basics of Medicine, Pharmaceutical Development, Regulatory Affairs, Types of Medicine, Clinical Development and Trials, Health Technology Assessment, Drug Discovery, Personalized Medicine, Non-Clinical Studies, Safety of Medicines, Benefit and Risk Assessment, and Pharmacoeconomics. At the bottom, there are three main action buttons: "DISCOVER!" (with a magnifying glass icon), "ADAPT!" (with a pencil icon), and "SHARE!" (with a speech bubble icon). Each button has a brief description and a "GET INFO!" or "LEARN FROM PEERS!" button below it.

- Discover a NEW online Educational Toolbox on Medicines Research & Development
- Find the Toolbox at: www.eupati.eu
- More than 100 topics in 7 languages for patients and patient advocates to discover, adapt and share.
- An up-to-date and understandable online information resource designed to enable more meaningful patient involvement.
- Information and education to help engage patients and patient advocates.

As long as the source is acknowledged users can download, print and adapt the materials for their own use or share the information with others.
